

# What is in The Fox in a Box Kit

## 6 x Wire Rope Grips

Rated for life support  
3 are used at the start end  
and 3 at the finish.

## 1 x Zip line wire with pre formed eye.

## 1 x Zipline Pulley and Triple locking steel Karabiner

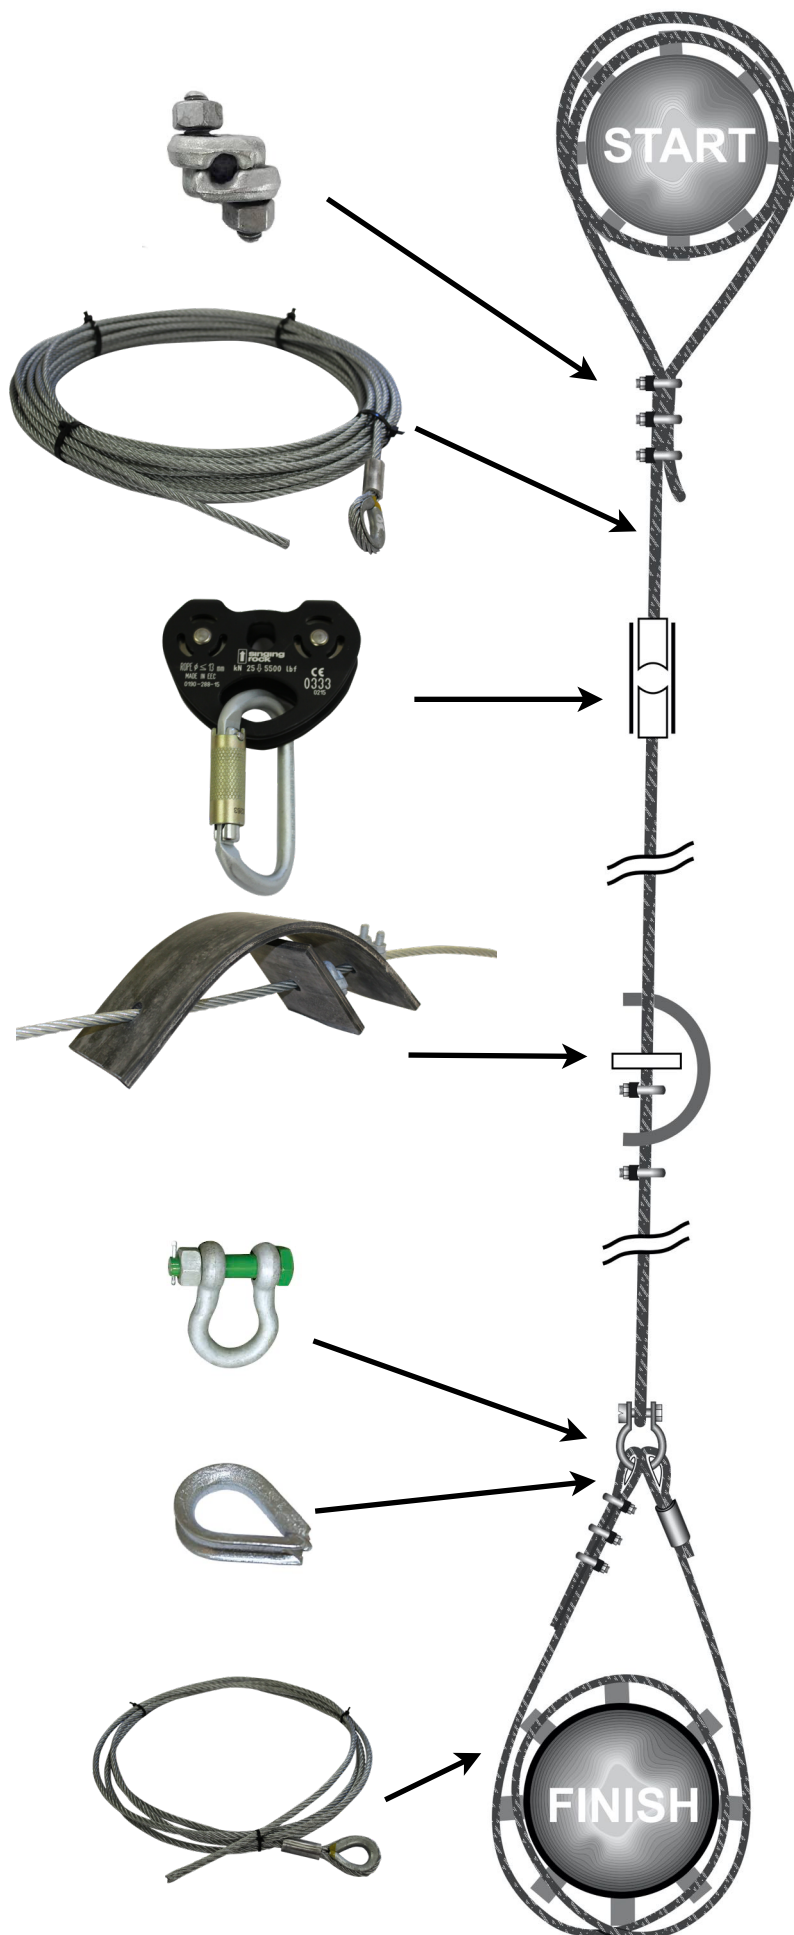

## STOP SNAKE:

2 x Rubber pads.  
2 x 12 mm washers.  
2 x Wire Rope Grips.

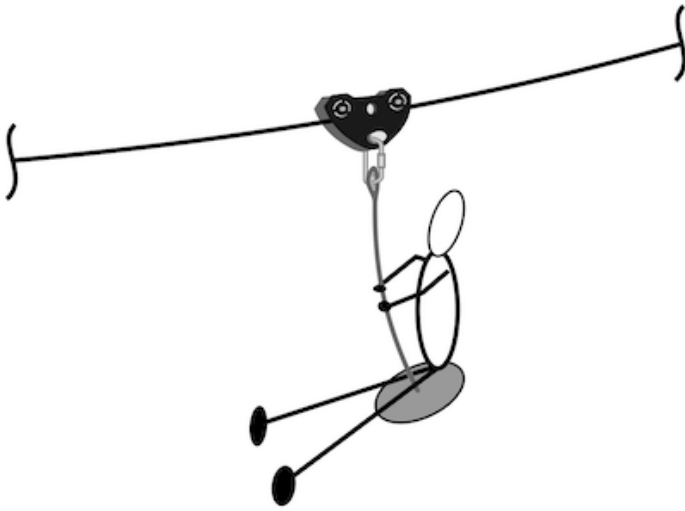

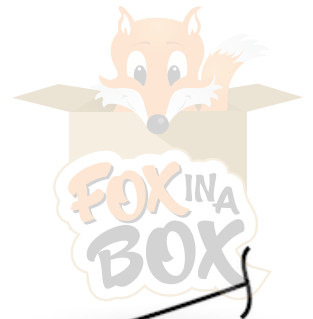

## 1 Shackle, with split pin.

## 1 Wire rope thimble

## 1 ANCHOR SLING, with pre formed eye.

## Pommel Seat / Handlebar options

**Plywood Pommel:**  
Supplied as Standard

**Plastic rod handlebar:**  
Supplied as Standard

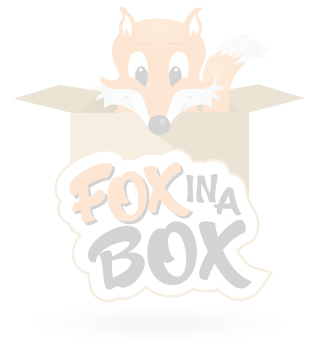

**Fancy Pants Seat**  
A playground grade  
rubberised seat.  
Available as an extra

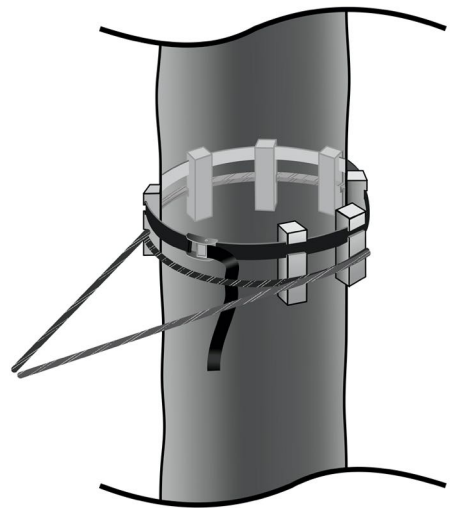

**ISC Zippey Pulley with  
handlebars:**  
Available as an extra

**Tree Huggers are available as an extra**

**The 'tree huggers' are designed to protect your trees, from the rubbing of the wire, but more importantly to prevent ringbarking the tree.**

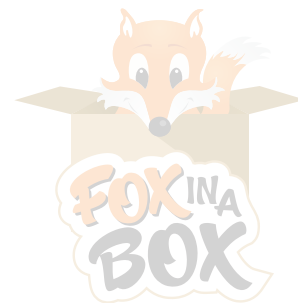

**Each tree hugger kit contains:**

6 x wooden blocks

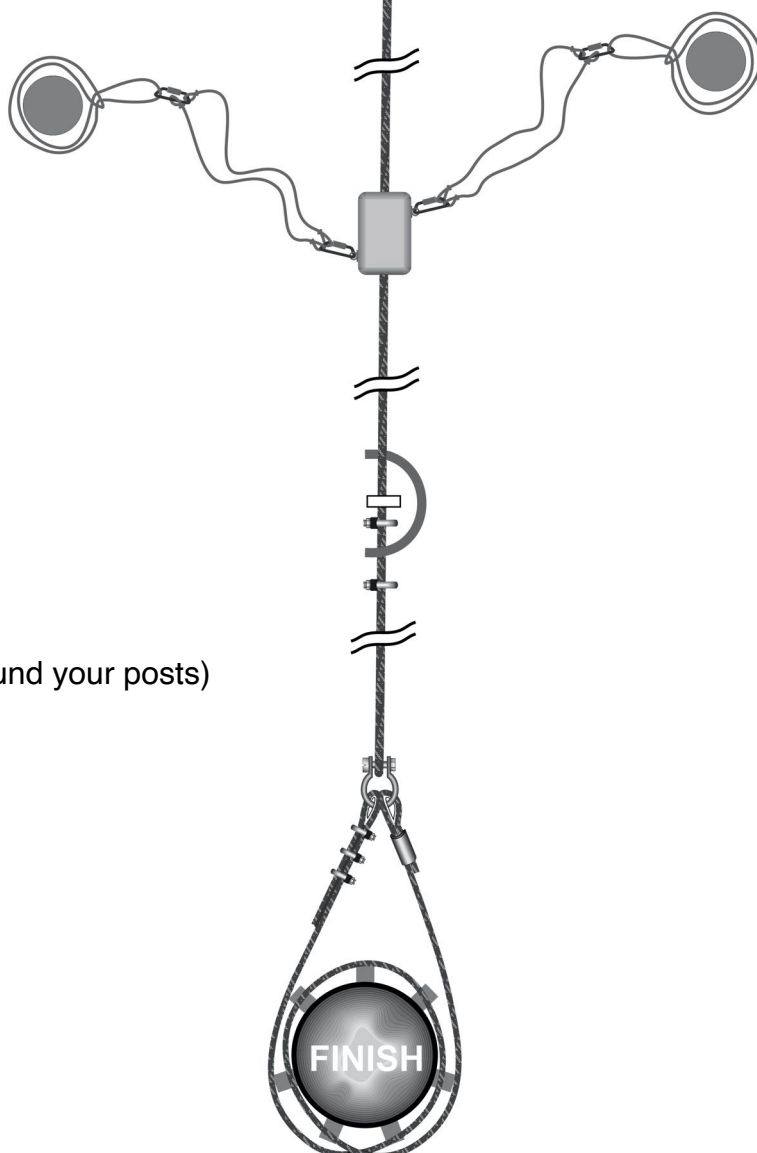

1 x 3.2 Meter cam strap for easy installation.

**Bungee Brake is available as an extra**

**If your gradient is 5% and 7% of span a bungee brake can work well.**

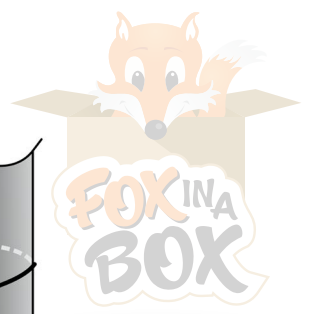

**You will need to install some extra posts to attach it to.**

**The bungee brake kit contains:**

- 1 x Hardwood brake block
- 2 x lifting slings (to act as anchors around your posts)
- 4 x steel rapid links
- 4 x 5 meter lengths of bungee rope.

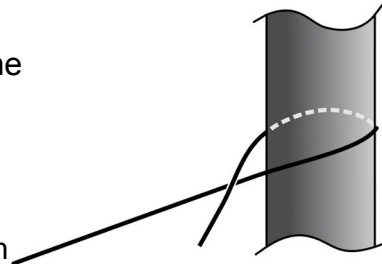

## Tensioning the zip line with a winch

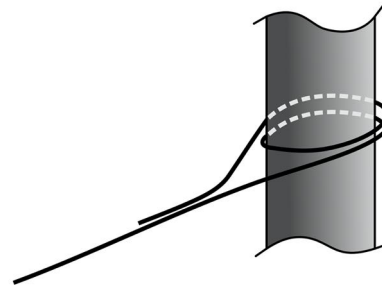

The start end of the Fox in a Box kit is secured to the start anchor by:

1: Pulling the wire to required tension.

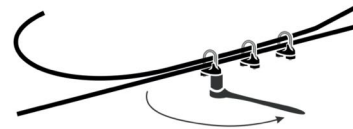

This is a simple process but the wire rope weighs 380 grams per meter, so Step 1 can get heavy on longer zip lines.

2: Wrapping the wire around the anchor.

3: Installing then tightening the wire rope grips.

**For Zip Lines less than 20 meters:** You probably won't need a winch, but just in case a simplified winch is included.

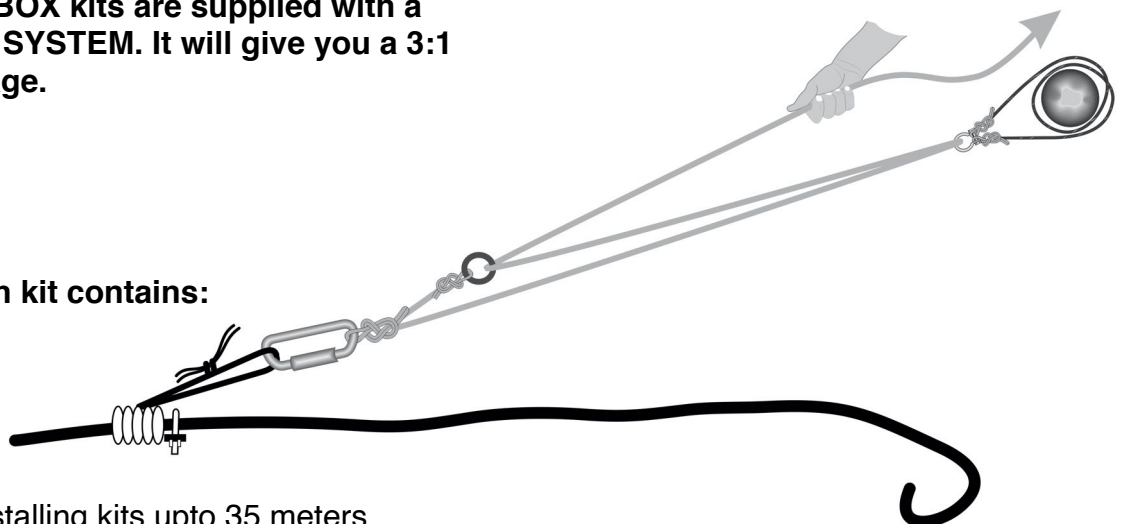

**For Zip Lines up to 35 Meters:** The simplified winch will be adequate.

**For Zip Lines between 35 and 120 Meters:** The heavy winch will be perfect.

**All of our FOX IN A BOX kits are supplied with a SIMPLIFIED WINCH SYSTEM. It will give you a 3:1 mechanical advantage.**

**The simplified winch kit contains:**

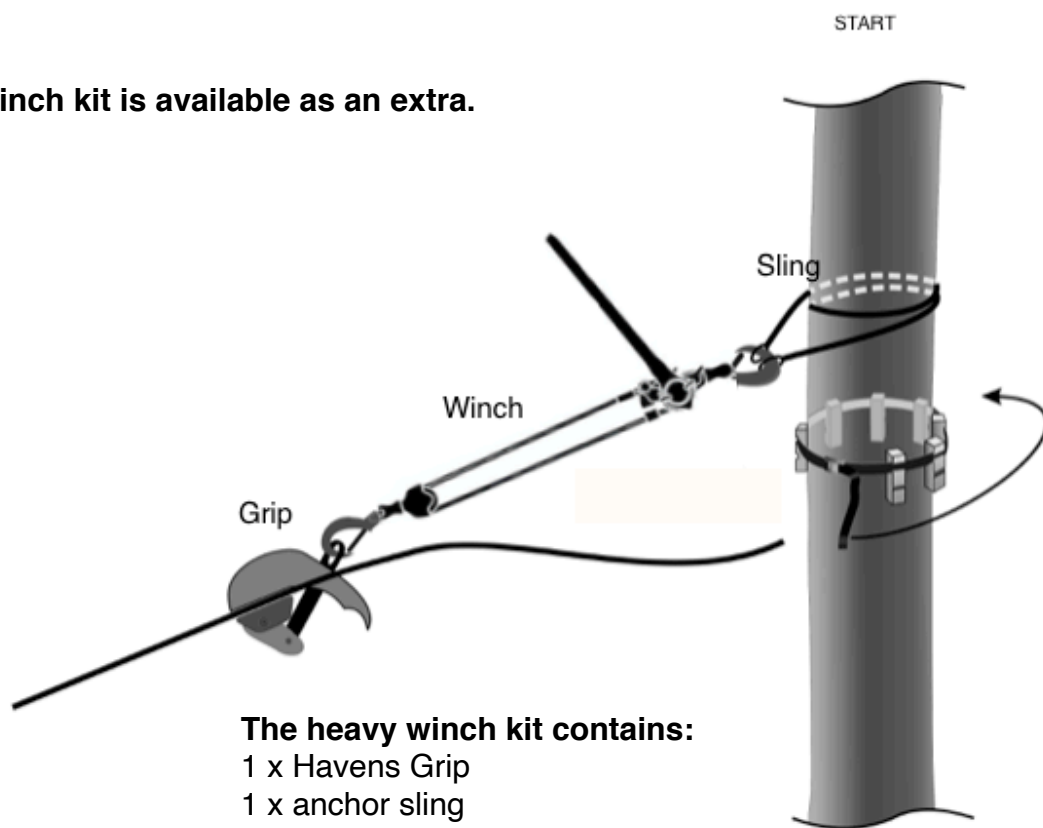

- 1 x Prussic loop
- 1 x wire rope grip
- 1 x anchor sling
- 1 x winching rope

It will work well for installing kits up to 35 meters

**The heavy winch kit is available as an extra.**

**The heavy winch kit contains:**

- 1 x Havens Grip
- 1 x anchor sling
- 1 x wire winch 1Ton capacity

It will work well for installing kits upto 120 meters
